EDGE AI

POWERED BY
AVCIT

The Monitoring Challenge

Too Many Cameras

Not enough eyes. Attention naturally drifts across large screen arrays.

Fatigue Causes Gaps

Alert fatigue and long shifts cause genuine events to go unnoticed.

Delayed Response

Every minute of delay increases exposure to loss, liability, or harm.

Supervisors Overstretched

Management cannot realistically monitor every feed in real time.

What AlertPro AI Does

Adds a Real-Time Alert Layer

Connects to your existing CCTV. No rip-and-replace required.

Faster Team Response

Relevant alerts reach the right people at the right time.

On-Site Edge AI Processing

Runs locally via an edge AI box installed at your facility.

Supports Security and Operations

Designed for both security staff & operations supervisors.

AI assists. Humans verify. Management controls.

Algorithms Capabilities

Intrusion & Perimeter Alerts

Object & Zone Monitoring

Asset Protection & Occupancy

Violence / Fight Detection

Fire/Smoke Early Alert

Fall Detection

PPE Compliance

Facial Recognition

Rapid Video Search & Forensic Recall

Operational Value

Monitoring fatigue reduction

Upgrade without replacing cameras

Faster anomaly visibility

Multi-camera coverage multiplier

Local processing architecture
